

# Productivity on the Go

What's New in BlackBerry Secure Productivity Apps

## BlackBerry Secure Productivity Apps

---

- BlackBerry Work
- BlackBerry Desktop
- BlackBerry Notes

BlackBerry secure productivity apps (BlackBerry® Dynamics™ apps) give your employees the freedom to work from any device (personal or corporate-owned), while protecting corporate and user data with industry-leading containerization. BlackBerry offers a comprehensive collection of secure apps to boost productivity while safeguarding valuable corporate intellectual property in the changing workplace.

### BlackBerry Work

#### Enhanced Email Editing

Users can now edit their email messages with bold, italics, underline, font type/size/color, background color, numbered and bulleted lists, indent and text alignment.

#### HTML Support in Calendar

Users can now see and use calendar notes as they were formatted on desktop clients and edit without losing HTML formatting.

#### S/MIME Improvements

BlackBerry® Work users who are already using S/MIME encryption can now send email messages to distribution lists.

## Offline Docs Support

In addition to individual files, entire folders can now be marked for offline usage. This new feature allows users to have all their files available to them, even when in an area with limited to no coverage.

## BlackBerry Desktop

### Safe Browsing/URL Filtering

Safe browsing provides enhanced security with malicious URL filtering and anti-phishing capabilities. Real-time URL scanning via INFINITY cloud provides instant assessment of the safety of the URL. The embedded BlackBerry® Protect library leverages local machine learning models to identify unsafe URLs for a secure browsing experience regardless of the device's current context or network connectivity.

### Policy-Based Microphone and Camera Support

BlackBerry® Desktop now provides policy-based microphone and camera support to allow macOS® and Windows® users to join audio and video calls using Zoom, Microsoft® Teams, Webex® and more without the need to install separate desktop clients.

## BlackBerry Notes

### Syncing Notes with Image Attachments

BlackBerry® Notes currently supports syncing notes with attachments, where the attachments have been added by external clients (e.g. OWA 2013/2016/O365). This enhancement allows users to add images using their device camera or picture gallery.

## Additional New Features in BlackBerry Dynamics

More features have been added to BlackBerry Dynamics. You can find more information in the "What's New in BlackBerry Dynamics" document or [BlackBerry Dynamics Platform webpage](#).

## About BlackBerry

BlackBerry (NYSE: BB; TSX: BB) provides intelligent security software and services to enterprises and governments around the world. The company secures more than 500M endpoints including 175M cars on the road today. Based in Waterloo, Ontario, the company leverages AI and machine learning to deliver innovative solutions in the areas of cybersecurity, safety and data privacy solutions, and is a leader in the areas of endpoint security management, encryption, and embedded systems. BlackBerry's vision is clear — to secure a connected future you can trust.
