

MCS Physician Drug Solution

The MCS Physician Drug Solution gives BlackBerry Wireless Handheld users mobile access to the most comprehensive database of all prescription and OTC drugs supported by a suite of drug-related functions including drug-to-drug interactions, side effects, contraindications, indications, and age-based dosing.

The MCS Physician Drug Solution facilitates everyday care of the patients on a constantly updated database to avoid unnecessary errors.

- Offers access to the most comprehensive databank of prescription, alternative medicine, and OTC drugs in the North American marketplace.
- Facilitates physician validation of drug interactions, side effects, indications, and contraindications as well as dosing regiments for various ages.
- Provides immediate up-to-date information and unlimited future expandability (E-scripting, CME, EMR, and immediate notification of new drug approvals and problems) as all applications are run off our centralized, server-based systems.
