

MobileAccess for Microsoft CRM

TenDigits MobileAccess for Microsoft CRM is a leading packaged software application that enables rapid deployment of Microsoft CRM to mobile employees with a fully integrated, out-of-the-box solution on BlackBerry Wireless Handhelds—even in customized implementations. MobileAccess provides reliable, secure access to business data regardless of network connectivity through an intuitive user experience.

TenDigits MobileAccess for MSCRM® provides BlackBerry users access to their Microsoft Customer Relationship Management™ system information including offline availability to Contacts, Accounts, Opportunities, Leads and Activities with an easy-to-use, multi-tasking user interface. It gives organizations and their mobile sales professional's information to time-critical client information—even when out of network coverage.

- Increases productivity by providing sales professionals access to their corporate CRM information while on the go.
- Enables wireless organizational processes to mobile professionals that speed delivery, follow-up and service levels with clients across divisions.
- Offers the opportunity to obtain tangible ROI benefits and minimize TCO by leveraging your existing technology investments with the combined power of BlackBerry 'Always On, Always Connected™' technology and Microsoft CRM's business workflow.
