To view details, click the text.

Highlights of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design
- BlackBerry ID
- FM Radio
- BlackBerry Browser
- Media server support
Key features of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design

  The BlackBerry Curve 9220 smartphone features 109-by-60-by-12.7 mm dimensions, a trackpad for precise selection, and a full keyboard that includes a dedicated key for every letter.
Key features of the BlackBerry Curve 9220 smartphone

Highlights of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design
- BlackBerry ID
- FM Radio
- BlackBerry Browser
- Media server support

BlackBerry ID

With BlackBerry ID, you can use a single sign-in identity across BlackBerry products, sites, services, and apps, such as the BlackBerry App World storefront, on your smartphone. After you create a BlackBerry ID, you only need to use one email address and one password to log in to any products that use BlackBerry ID.
Key features of the BlackBerry Curve 9220 smartphone

To view details, click the text.

Highlights of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design
- BlackBerry ID
- FM Radio
- BlackBerry Browser
- Media server support

**FM Radio**

You can use the FM Radio to listen to radio stations on your BlackBerry smartphone.

To open the FM Radio, on the home screen, click the Media icon > FM Radio.

**Note:** You must have wired headphones plugged into your smartphone to use the FM Radio.

To view the job aid, click [here](#).
Highlights of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design
- BlackBerry ID
- FM Radio
- BlackBerry Browser
- Media server support

BlackBerry Browser

The BlackBerry Browser is designed to make websites appear on the smartphone like they do on a computer screen.
Highlights of the BlackBerry Curve 9220 smartphone include the following:

- Stylish and practical design
- BlackBerry ID
- FM Radio
- BlackBerry Browser

Media server support

Media server support allows you to wirelessly share media files on your smartphone with supported devices such as computers, TVs, or other home entertainment equipment.

You can synchronize files between your smartphone and computer using a USB cable, or you can use Bluetooth technology to send files to or receive files from a Bluetooth enabled device.
The BlackBerry Curve 9220 smartphone is designed for feature phone users who want to upgrade to an easy-to-use smartphone that features a stylish design with compelling features. These users want features such as social networking, BBM, internet access, and multimedia capabilities to help them stay connected with everything that matters.

Troubleshooting the BlackBerry Curve 9220 smartphone

Click the following to see how to resolve common troubleshooting issues.

- Switching smartphones
- Email setup
- BlackBerry ID
Troubleshooting the BlackBerry Curve 9220 smartphone

The BlackBerry smartphone user does not know how to switch smartphones.

To switch smartphones, use the BlackBerry Desktop Software or switch from a smartphone running BlackBerry 7 or later to another smartphone running BlackBerry 7 or later with a media card.

To switch BlackBerry smartphones, a BlackBerry smartphone user must save the data to the media card and then restore it on the new BlackBerry smartphone.

To learn how to switch BlackBerry smartphones using a media card, click the icon.

To view the job aid, click here.
The BlackBerry smartphone user does not know how to set up an email account.

To set up an email account, the BlackBerry smartphone user must complete the following actions:

- Set up a BlackBerry Internet Service account.
- Set up a BlackBerry email address or associate an existing email address.

To learn how to setup BlackBerry email addresses or and existing email address click the icon.

To view the job aid, click here.
Troubleshooting the BlackBerry Curve 9220 smartphone

Click the following to see how to resolve common troubleshooting issues.

Switching smartphones

Email setup

► BlackBerry ID

The BlackBerry smartphone user does not know how to set up a BlackBerry ID.

You will be asked to create a BlackBerry ID account during the setup process on your smartphone. You can use any email address you would like to for your BlackBerry ID. If you have a username and password that you use for email addresses on your smartphone, that username is different than your BlackBerry ID.

To set up a BlackBerry ID account, click the icon.

To view the job aid, click here.

Visit blackberryid.blackberry.com/bbid/login/ to update your BlackBerry ID information.

Using BlackBerry ID

About BlackBerry ID

With BlackBerry® ID, you can use a single sign-in identity across BlackBerry products, sites, services, and apps. Your BlackBerry ID is not specific to one BlackBerry device, so you can sign in using your BlackBerry ID from a smartphone or tablet. After you create a BlackBerry ID, you only need to use one email address and password to log in to any products that use BlackBerry ID, including the following:

- BlackBerry App World™ storefront
- BlackBerry® Internet Service email accounts
- BlackBerry® Messenger
- BlackBerry® News
- BlackBerry® Podcasts
- BlackBerry® Protect

If you are running BlackBerry® 7 or later, you can sign in to BlackBerry ID using your existing BlackBerry ID or create a new BlackBerry ID during the setup process on your smartphone. You can use any email address for your BlackBerry ID. If you have a user name and password that you use for email addresses on your smartphone, that user name is different from your BlackBerry ID.

Note

It is not recommended to use a BlackBerry email address, such as user@<carrier>.blackberry.com, for your BlackBerry ID. Hosted email addresses filter password recovery emails as a security measure, so you will be unable to retrieve your login information.

Sign in with a BlackBerry ID

To sign in with an existing BlackBerry ID during the initial setup process, complete the following steps:

1. Enter your login information.
2. Click Sign In.
Create a BlackBerry ID

To create a BlackBerry ID during the initial setup process, complete the following steps:

1. Click Create New.

2. If you accept the license agreement, click I Agree.

3. Enter your login information.

4. Click Submit.
Resources

The following resources are available to support the BlackBerry ID:

- Job aids
  - 711-02640-xxx Support Resources for the BlackBerry Solution
  - 711-03701-xxx Supporting BlackBerry 7
- User guides available at [http://docs.blackberry.com](http://docs.blackberry.com)
- BlackBerry Troubleshooting Toolkit available at [www.blackberry.com/troubleshootingtoolkit](http://www.blackberry.com/troubleshootingtoolkit)

- Official BlackBerry Channel on YouTube® available at [www.youtube.com/blackberry](http://www.youtube.com/blackberry)
Using the Universal Search Feature

About the universal search feature

You can use the universal search feature to search the Internet or search for items on your BlackBerry® smartphone, including applications, contacts, media files, messages, and more. With BlackBerry® 7 and later, the universal search feature includes voice enabled search, so you can say your search terms or type them.

Using the universal search feature

You can access the universal search feature by doing one of the following:

- Type on the home screen
- Click the search icon in the upper-right corner of the home screen
- Click the microphone icon and say a search term

Local search results, including contacts and files, are displayed directly below the search field, followed by expanded search results, including web-based applications. To expand your search to the Internet, click the application that you want to search.
When you enter numbers or phone numbers that contain letters in the search field, you have the option of dialing the number. To dial the number, press the Send key.

Voice enabled search

You must be connected to the wireless network to use the voice enabled search feature. When the voice enabled search feature is activated, you can talk into the smartphone and see a translation of what you said in the search field. This application uses speech-to-text translation software and is supported across a variety of languages, including the following:

- English
- French
- Spanish
- Italian
- German

To use the voice enabled search feature, complete the following steps:

1. Click the search icon.
2. Click the microphone icon.
3. If you accept the terms of the license agreement, click Accept.
4. Say your search terms.
5. Click Done.

Note: A message might appear indicating that the search term was not clear and should be repeated.
Customizing the universal search feature

If you only want certain items included in searches, you can customize the universal search feature.

To specify the types of items included in searches, complete the following steps:

1. On the home screen, click the **Options** application.
2. Click **Device > Search**.
3. Specify the types of items that you want to include in searches.
4. Press the **Menu** key > **Save**.

Troubleshooting

To make sure that the universal search feature is enabled, complete the following steps:

1. On the home screen, press the **Menu** key > **Options**.
2. In the **Launch by Typing** field, click **Universal Search**.
Resources

The following resources are available to support the universal search feature:

Using FM Radio

About FM Radio

You can use the FM Radio to listen to radio stations on your BlackBerry® smartphone. Depending on your smartphone model, the FM Radio might not be available.

Visit www.blackberry.com/smartphones to see if your smartphone supports this feature.

Note
You must have wired headphones plugged into your smartphone to use the FM Radio.

Using FM Radio

To open the FM Radio, on the home screen, click the Media icon > FM Radio.

<table>

<td></td>
</tr>
</tbody>
</table>
Seek the previous or next radio station

Move to a specific radio station

**Turn on or turn off scan mode**

When you turn on scan mode, your smartphone will tune in to the first available radio station, pause on it, and then tune in to the next available radio station. The FM Radio will continue to scan until you turn off scan mode.

To turn off scan mode, click the trackpad or tap the screen.

**Manage favorites**

You can add, play, edit, delete, and sort favorite radio stations.

**Troubleshooting**

Consider the following when troubleshooting issues with the FM Radio:

- You must have wired headphones plugged into your smartphone to use the FM Radio.
- Depending on your smartphone model, this feature might not be supported.
- An FM radio signal might not be available in your area.
• An IT policy present on the smartphone might prevent the smartphone from using the FM Radio.
• Environmental objects, such as buildings, might obstruct the FM Radio signal.

Resources

The following resources are available to support the FM Radio:

• Job aids

Switching BlackBerry Smartphones

You can use one of the following methods to switch from your current BlackBerry® smartphone to a new BlackBerry smartphone.

**Using BlackBerry Desktop Software**

Before you switch smartphones, visit [www.blackberry.com/desktop](http://www.blackberry.com/desktop) to install the latest version of the Blackberry® Desktop Software.

To switch smartphones using BlackBerry Desktop Software, complete the following steps:

1. Connect your new smartphone to your computer using a USB cable.
2. Open the BlackBerry Desktop Software.
3. Click **Device > Switch devices.**
4. Complete the instructions on the screen.

You can use the BlackBerry Desktop Software to transfer information from your current smartphone to your new smartphone, including the following:

- Data
- Applications
- Email messages
- Media files

To transfer information from your current smartphone to a new smartphone, complete the following steps:

1. Connect your current smartphone to your computer using a USB cable.
2. Open the BlackBerry Desktop Software.
3. Click **Device > Switch Devices.**
4. Select **Device data** and **Third-party application.**
5. When prompted, connect your new smartphone.
6. Complete the instructions on the screen.

**Using BlackBerry Web Desktop Manager**

Before you switch smartphones, visit [www.blackberry.com/webdesktopmanager](http://www.blackberry.com/webdesktopmanager) to install the latest version of BlackBerry® Web Desktop Manager.

To switch smartphones using BlackBerry Web Desktop Manager, complete the following steps:

1. Connect your new smartphone to your computer using a USB cable.
2. Open BlackBerry Web Desktop Manager.
3. Click **Yes – Switch my BlackBerry services to this device**.
4. Click **Yes – Transfer the data**.
5. Complete the instructions on the screen.

**Warning:** Do not disconnect your smartphone from your computer until the activation process on your smartphone is complete.

### Using a media card

You can use a media card to switch from a smartphone running BlackBerry® 7 or later to another smartphone running BlackBerry 7 or later.

**Note**

With BlackBerry 7.1 or later, BlackBerry® Enterprise Server information is transferred and activation is automatically initiated.

To save data on a media card, complete the following steps on your current smartphone:

1. On the home screen, click the **Setup** application.
2. On the **Setup** tab, click **Device Switch**.
3. Click **Using a Media Card > Save Data**.
4. To save email messages, on the **Save Data** tab, select **Save emails**.
5. Click **Continue**.
6. Create a password for your saved data and click **Save**.
7. Click **Return to Setup**.

To transfer data from a media card, complete the following steps on your new smartphone:

1. On the home screen, click the **Setup** application.
2. On the **Setup** tab, click **Transfer Data**.
3. Click **Continue**.
4. Click **Continue**.
5. Enter the password for the saved data and click **Enter**.
6. Click **View Transfer Details, Delete Saved Data, or Return to Setup**.
Setting Up Email with BlackBerry 7

To send and receive email messages on the BlackBerry® smartphone, you must complete the following steps:

1. Set up a BlackBerry® Internet Service account.
2. Set up a BlackBerry email address or associate an existing email address.

Set up a BlackBerry Internet Service account

You must set up and sign into a BlackBerry® ID account before setting up a BlackBerry Internet Service account. To set up a BlackBerry Internet Service account using the smartphone, you must complete the following steps:

1. On the Home screen, click the Setup application.
2. On the Setup tab, click Email Accounts.
3. Click Ok.

The first time that you perform a BlackBerry Internet Service setup on your smartphone, you will be prompted to read the legal terms and conditions, and if you agree, select Yes and click I Accept.

Note
With BlackBerry® 7, you cannot create a user name and password to access the BlackBerry Internet Service website.

Add an existing email address to the BlackBerry Internet Service

To add an existing email address to the BlackBerry Internet Service using the smartphone, you must complete the following steps:

1. On the Home screen, click the Setup application.
2. On the Setup tab, click Email Accounts. If necessary, type your user name and password.
3. Press the Menu key. If necessary, click Internet Mail Account.
   Note: If you have set up a work email account with a BlackBerry® Enterprise Server, this step is not required.
4. Click Add Email Account.
5. Click your email account type.
6. Type your email address information.
7. Click Continue.
