

CHOOSE A UEM SOLUTION WITH LOW TOTAL COST OF OWNERSHIP

Your mobility management infrastructure might look like this:

But wouldn't this be better (not to mention more cost effective)?

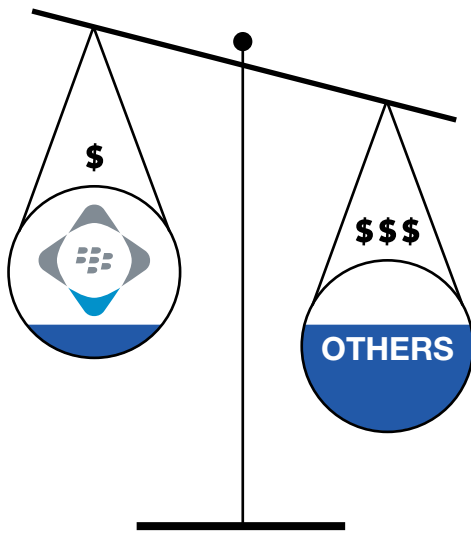

Save over 60%* when you simplify mobility management with BlackBerry UEM

- 1** Fewer components
 A simplified infrastructure means fewer hardware components, faster deployment and less maintenance.
- 2** Robust security
 Air-tight security means you don't need to pay for VPN connections and concentrators.
- 3** A single vendor
 One solution to manage all of the operating systems you rely on — with one easy path to support.

Weighing the costs

- › Unified server footprint
- › Robust security
- › One point of contact
- › Easy migration and faster deployment
- › Lower maintenance and support costs

- › Multiple hardware components
- › Complex deployment increases downtime
- › Professional migration services required
- › Additional training and certification
- › VPN connections and concentrators

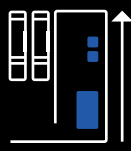

But it's not just about cost

While cost is an important consideration when choosing a UEM solution, it's not the only factor organizations should be evaluating.

Security

Worry-free security from end to end.

Scalability

Built from the ground up as a modern, services-based architecture.

Ease of use

Consolidates endpoint management with a single, powerful console.

Experience the cost-saving benefits first hand
