

BlackBerry Cybersecurity Consulting:

Training & Certification

The Challenge

Enterprises need training options, from basic security awareness training to government accredited professional qualifications for cybersecurity professionals.

The Solution

All of our training courses are led by highly experienced Cybersecurity professionals with real life, and up-to-date experience gained through extensive work in the field.

Security Awareness Training

Are your staff unknowingly leaking information? Hackers use social engineering techniques to manipulate your staff to extract information that will enable them to bypass existing security protocols. We offer half day and full day courses to raise awareness of the techniques that hackers use in order to help develop your people in to security assets.

Training for Cybersecurity Professionals

We are able to offer a wide range of professional IT security and forensics training courses for organizations of all sizes, both in the public and private sector. Our courses can be tailored to specific requirements or cover structured syllabi and is delivered by IT security professionals who have real world experience of penetration testing and forensics.

We offer training courses in penetration testing as well as offering NCSC recognized qualifications. BlackBerry Cybersecurity Consulting is an approved training provider with Tiger Scheme, a not-for-profit training and certification scheme for individuals looking to enter and advance in the Information Security industry.

We also offer training in Secure Code Development, Social Engineering, Forensics First Response and Penetration Testing Management / Coordination.

Courses in Cybersecurity

All training courses can be customized to meet specific requirements based on your needs and can be offered on or off customer site. Examples of courses offered below:

Course	Description
Introduction to Cybersecurity (1 day)	Covers the basics of ethical hacking, digital forensics, social engineering/red team operations and ethical web application hacking aimed as a starting point for anyone with an interest in IT who may wish to pursue a career in cybersecurity.
Secure Web Application Training (2 days)	Learn how to design security robust web apps. Not only are we reviewing the code behind these common errors, we will also instruct attendees in the field of penetration testing so that they may identify flaws in web applications.
Cybersecurity Coordinator (CSC) Training (1 day)	Provides candidates with the tools and techniques necessary to ensure that the objectives of security testing are met. This course is for anyone involved in organizing penetration testing, procuring penetration testing or managing a penetration test.
BlackBerry Forensic Incident; First Responder (FIFR) Training (2 days)	Designed to bring those who may need to collect computer evidence up to speed. Incorrect handling of evidence could destroy vital clues and/or lead to a case being inadmissible in court.
Cybersecurity Professional Level 2 (CSP2) Training (5 days)	This course is designed for IT professionals who want to learn about ethical hacking, pen testing and security but do not need a UK CHECK equivalent qualification. This course covers the theoretical & practical aspects of penetration testing in a real-life, hands-on scenario.
Intensive Networking (IN) Training (1 day)	This course is designed specifically for candidates who do not have the full pre-requisites to embark on the CSP2 or CTM course or for those wishing to refresh their knowledge prior to attending.
CHECK Team Member QSTM Training (5 days)	During the QSTM/CTM Tiger Scheme course candidates are taught the theoretical & practical aspects of ethical hacking and penetration testing in a real-life, hands-on scenario. Gain a Tiger Scheme UK CHECK Team Member qualification.
Staff Security Awareness Training (0.5 to 1 day)	Our Security Awareness Training makes staff aware of the various risks in a practical and appealing way and ultimately creates a 'security aware culture' within your business.
