

# BlackBerry Docs To Go

## The Challenge

Today's mobile workforce wants a quick, easy way to create and edit documents on the go--without limitations. The ability to make last-minute changes is crucial, especially for meetings and presentations. But enterprises are concerned that mobile document editing threatens corporate data.

## The Solution

BlackBerry® Docs To Go is an all-in-one enterprise document solution that streamlines mobile editing. It allows you to securely create, edit and format Microsoft Word documents, Microsoft Excel spreadsheets and Microsoft PowerPoint presentations – as well as view PDF files – straight from your device.

### Manage Documents On the Go, Even When Offline

Unlike office editing tools that rely on connectivity, BlackBerry Docs To Go lets you take care of your editing needs anytime, anywhere – even when offline.

Open files from BlackBerry Docs To Go and other integrated BlackBerry enterprise apps to make quick changes for any business purpose, whether to collaborate on projects with colleagues, make a quick inventory change to an Excel sheet, or fix a slide on a PowerPoint presentation before a meeting.

With BlackBerry Docs To Go, you no longer have to wait to get to a desktop to manage documents. Last-minute changes are now possible with just a few taps on your device.

### Experience Desktop-Like Capabilities

BlackBerry Docs To Go offers desktop-like features that allow you to take document edits beyond simple text modifications. You can change formats, redo and undo changes at any time, format characters with rich text, and use the find-and-replace feature to make quick changes to large files.

BlackBerry Docs To Go makes preparing for important off-site meetings easy. You can quickly rearrange a Microsoft PowerPoint slideshow, rehearse and even choose to make the presentation straight from your device.

## Organize Documents in One Place

BlackBerry Docs To Go keeps enterprise files separate from personal files while giving you quick access to documents created in the app – as well as documents stored in other BlackBerry enterprise apps. For easy navigation and quick edits, tabs organize your documents by file type (all, doc, xls, ppt).

## Keep Data Secure

BlackBerry Docs To Go is part of BlackBerry Secure, a comprehensive endpoint-to-endpoint approach to security. BlackBerry Docs To Go is built on BlackBerry® Dynamics, the gold standard for mobile security, so IT can maintain control of enterprise data while edits are made. Your data is stored in a secure document container and protected with military-grade AES encryption in transit and at rest, eliminating the threat of data leakage.

## About BlackBerry

BlackBerry is securing a connected world, delivering innovative solutions across the entire mobile ecosystem and beyond. We secure the world’s most sensitive data across all end points – from cars to smartphones – making the mobile-first enterprise vision a reality. Founded in 1984 and based in Waterloo,
